NAVFAC ERB Web Site

Find Solutions to Your Cleanup Needs!

Welcome to NAVFAC's ERB web site.

We've designed the web site as a one-stop resource for Department of the Navy (DON) personnel, contractors, and the public interested in environmental site cleanup efforts.

The content has been updated based on input from across NAVFAC to support DON Remedial Project Manager (RPM) needs.

New features include:

- **Overview Pages:** Describe how DON implements the Environmental Restoration Program (ERP).
- **Program Support Pages:** Summarize important steps to accomplish as part of the cleanup process.
- **Focus Area Pages:** Share the current scientific understanding and best practices for efficient management of sites facing complex issues.
- **Training Pages:** Announce in-person and online training opportunities to stay up to date on the latest developments in the field.
- **Resources Page:** Links to a comprehensive list of relevant policies, guidance, technical reports, and tools in a single location.
